POWER BI CLASSWORK

Now that you have some understanding of Power BI, let's create our first Power BI report.

The focus of this report will be,

- o   For a specific manager
- o   Show staff distribution by department
- o   Gender break-down
- o   All of their staff by salary and rating
- o   Visualize he picture of the staff in a table and their salary

This is a fairly simple report, but it *does* demonstrate the power, elegance and ease of working with Power BI.
